✦ Operating System: Windows 7, Windows 8, Windows10.
✦ Microsoft office: MS Word, MS Excel, MS PowerPoint.
✦ Data Base: SQL.

PROJECTS

✦ **Authentication and Validation of products and certificate using Blockchain:**

  Created an application to Authenticate and Validate Products and Certificates using Blockchain, to tackle against the rising tide of counterfeit products and ingenuine certificates. The application helps to fight against them by storing the products and certificates id's on Blockchain, as the ledger can be only updated by authorized persons, no one can hack it and modify the data that is stored.

✦ **A Website that serves students to stay on-date with college:**

Made a website that helps students to stay-on date with college. I've used HTML, CSS, bootstrap for frontend, Django as backend and SQLite for database. The website covers. Everything from on campus information events, circulars, schedules only visible after login and off campus information such as events, placements, courses and other student centric information can be viewed by everyone.

CERTIFICATES
